First Croatian independent record label focused on electronic music.

It was founded in 2001, with idea to promote quality Croatian house music, by Nedjeljko (Neno) Marcic, who wanted to "crown" his long period of active work in music industry with independent music label.

Main music styles we do are house, funky, jazzy, bossa nova, chill out and their fusions.
This music label gives the opportunity to young and not acclaimed artists to show their creativity.

Mindvision Records' goal is to promote and publish quality music worldwide, where the listeners themselves can give their opinion and can contact the artists directly.

The music is the motive which makes the whole project move, in which a group of Croatian music artists take part. There is a huge enthusiasm those people live with, so their whole life comes down to the music they like. They work and support the music which comes from their hearts and souls, in which they give themselves completely and live for the music. Our music comes down to the well known saying ...music for your soul....

Neno Marcic, founder
